LINTEC EUROPE

APPLYING FRESH VISION TO GLAZING

A scenic landscape featuring a calm lake in the foreground, reflecting the sky and surrounding scenery. In the background, there are mountains and a town with buildings. A bridge is visible on the right side of the lake. The foreground is dominated by vibrant autumn foliage in shades of red, orange, and yellow, which frames the top and right sides of the image.

Our unique films are the **ultimate solution** for glass decoration, branding, privacy, manifestation and safety – designed to transform the glazed environment.

Discover more about our ink-jet printable films, and our decorative and textured privacy films.

These innovative films enable **unrivalled creativity** where quality matters. Easy to use, they also deliver significant **sustainability** credentials.

INSPIRING CREATIVITY

Glass is an essential building material responsible for light and visibility within the modern built environment.

With LINTEC glazing films you can bring **brighter colour**, **higher definition** and **incredible detail** to glass displays. Explore clarity and translucency with subtle vignettes for privacy window graphics and create dazzling visual effects as light passes through the printed film on the glass surface.

You can also print **white and clear** ink with process colour to add further **depth and solidity** to imagery.

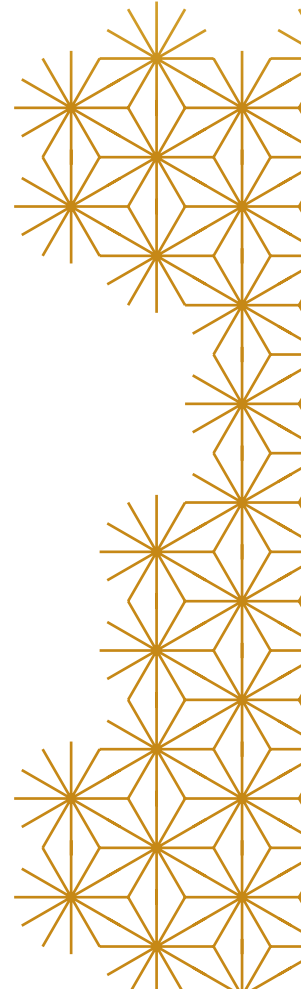

LINTEC EUROPE

SUPERIOR OPTICAL QUALITY

Our films are clean-room manufactured in Japan, for ***superior optical clarity*** and quality, ensuring optimum light transmission, low haze and minimal distortion.

Once the printed film is applied, it appears as if the design is ***directly printed*** onto the glass.

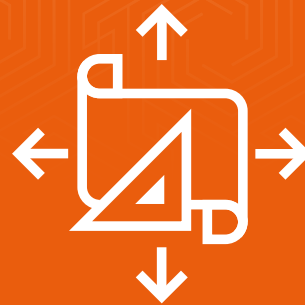

PRINTABLE HARD COATING

Our printable hard coating technology, available on selected films, makes them **uniquely durable** with a glass-like finish.

The hard coating provides **superior ink adhesion** and in the unprinted areas it delivers very high levels of scratch-resistance.

Your designs can cover the full span of glass, seamlessly, with **no cut edges**.

**SEAMLESS DESIGN
POSSIBILITIES**

LINTEC EUROPE

When it comes to disposal, you can feel reassured that our films are **100% PVC-free** and do not contain any migratory plasticisers.

By comparison, the content of many PVC films, used for window decoration, is over 30% plasticiser.

100%
PVC-FREE

SINGLE-PIECE REMOVABLE

Product lifecycle is always an important consideration. Because all our films are ***removable in a single piece***, it means that when a design refresh is required the film can be removed and replaced, ***simply and efficiently***.

LINTEC EUROPE

**BLOCKS 99% OF
ULTRAVIOLET LIGHT**

Selected films in our range feature a **unique UV filter** within the adhesive layer. This effectively prevents sunlight from degrading the printed graphics. It's particularly effective when internally applied to external facing glass in reducing the harmful impact of UV light on **people** and **interior furnishings**.

LINTEC EUROPE

ACHIEVING THE HIGHEST STANDARDS

Many of our films have achieved EN 13501 European Fire Safety Standard and VOC (Volatile Organic Compounds) emissions compliance.

We are committed to continuing to achieve the highest industry standards, along with delivering many additional sustainability benefits for ***people*** and our ***planet***.

ARCHITECTURAL FILM

E-2200ZC UV INK-JET PRINTABLE

Our flagship product E-2200ZC is made from environmentally friendly PVC-free materials and is coated with a **99% UV block adhesive**.

It features a unique printable hard coating that prevents surface damage typically caused by cleaning to unprinted areas – maintaining a **perfect glass-clear appearance**.

Not only does this enable more creativity, versatility and aesthetic installations – it's also **much longer-lasting**.

DECORATIVE & PRIVACY FILMS – PRE-PRINTED

WINCOS[®]

Our pre-printed range of WINCOS[®] films can be used to create both privacy and add visual enhancement to interior spaces.

From a gentle mist to full white-out opacity, the light diffusing and screening properties vary by design.

Our WINCOS[®] films feature **simple, elegant patterns** based on white printed lines and dots that have been designed to optimise safety and privacy, with aesthetic interior qualities.

The films are applied across the full glass surface with no cuts or edges.

The hard coating ensures a long-lasting, scratch-resistant finish that's easy to keep clean.

All WINCOS[®] films **block 99% of UV light** – minimising the impact on people and interior furnishings.

One of our most specified privacy films for stylish office interiors is our pre-printed dot pattern film. With these films, graduations can be specified as 'bottom-up' or 'centred', and at different heights – making this a **very versatile solution**.
